

Agenda

Traffic and Circulation Committee Meeting
Thursday, October 27th at NCSD, 148 South Wilson
9:00 to 11:00 am

These are items brought up by Dave Watson in an October 13th email regarding the 5-year traffic plan. Dave will be explaining and embellishing his concepts. I would like to have a discussion of these and determine if we want to accept any or all of these items and how we would accommodate these suggestions.

- (1) Determine how anticipated development patterns will exacerbate present or predicted problems,
- (2) Create a prioritization of traffic improvement projects listed in Table 12 for Areas 1 and 2,
- (3) Determine what can be done with predictable flows of incoming traffic mitigation fees to address immediate projects and priorities,
- (4) Find a means of identifying of incremental traffic conditions over the foreseeable future as these projects are implemented, projects
- (5) Require the development of a 5-year detailed capital improvement plan (CIP) to guide county staff and their consultants on the pressing priorities for Nipomo
- (6) Determine how best to influence county policies and work programs to get these projects completed.
